

Saniya Malik

8791006794 | saniyamk1111@gmail.com | [LinkedIn](#) | [GitHub](#) | Dehradun, India

Summary

Final-year Computer Science (B.Tech) student with hands-on experience in full-stack web development and applied machine learning. Skilled in building and deploying ML models, responsive web applications, and AI-driven platforms using Python, React, and TensorFlow. Seeking Software Engineer / Machine Learning Engineer trainee and fresher roles.

Education

Women Institute of Technology	Dehradun, India
Bachelor of Technology in Computer Science and Engineering; CGPA: 8.04	Sep. 2022 – July 2026
Durga Modern Inter College	Dehradun, India
Class XII (PCM) – 88.2%	2020 – 2021
Durga Modern Inter College	Dehradun, India
Class X – 89%	2018 – 2019

Experience

Tech Member	Oct. 2025 – Feb. 2026
Auralis AI Research Fellowship	Remote
- Conducted technical reviews and guided peer researchers on AI initiatives, maintaining high development and code-quality standards across projects. - Streamlined research team workflows and coordinated cross-team communication, managing technical resources to keep project milestones on schedule.	
WordPress Developer Intern	Jul. 2024 – Aug. 2024
Tech Yard Labs	Dehradun, India
- Engineered high-performance WordPress e-commerce sites using Elementor Pro, increasing user engagement by 17% and organic traffic by 20%. - Executed full-stack SEO audits and optimizations for 5+ client sites using SEMrush and GTmetrix, driving measurable gains in search visibility. - Built and launched an independent e-commerce site from scratch with a smooth, interactive UI/UX, achieving organic search rankings and inbound customer inquiries with zero ad spend.	

Projects

AI Resume Analyzer | **React , TypeScript , Tailwind CSS , Puter OS , Zustand**

- Built an AI-driven job-matching platform with automated resume parsing and candidate-to-job recommendation analysis.
- Implemented client-side authentication and managed real-time AI inference workflows.

Credit Card Fraud Detection | **Python, Scikit-learn, NumPy, Pandas, Streamlit**

- Developed a machine learning model to detect fraudulent transactions by analyzing transaction patterns.
- Optimized data preprocessing with NumPy and Pandas, and deployed an interactive real-time inference dashboard using Streamlit.

Personal Portfolio Website | **Next.js , TypeScript , Tailwind , Vercel**

- Developed a high-performance, responsive portfolio site to showcase technical projects, optimizing for speed and accessibility to deliver a modern, professional web presence.

Plant Disease Detection Model | **CNN , Keras , Tensorflow , OpenCV , React , JavaScript , Python**

- Developed an end-to-end plant disease detection and multi-class image classification system with a custom 2D CNN architecture & filters to classify & preprocess leaf images.
- With a 97% accuracy the model includes image optimization for robust disease classification by leveraging automatic feature learning, regularization and deep learning workflows for high-accuracy prediction on unseen plant leaf images.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL
Web Development: React.js, Next.js, HTML5, CSS3, WordPress
Machine Learning & AI : Scikit-learn, NumPy, Pandas, PyTorch, TensorFlow, Streamlit, Jupyter
Tools & Platforms : Git, VS Code, Android Studio, GTmetrix, SEMrush, Claude, Microsoft Azure

Certifications & Achievements

Published Research Paper on Marine Biodiversity and AI/ML
Smart India Hackathon Finalist, College Level (2x)
Research Opportunities (ROCS) Participant – ACM
High-Performance Computing (HPC) Workshop
Time Series Analysis in Machine Learning – Unstop
Java in Depth & DSA – Udemy
